Agreement

Partly based on Koeneman & Zeiljstra (2017)

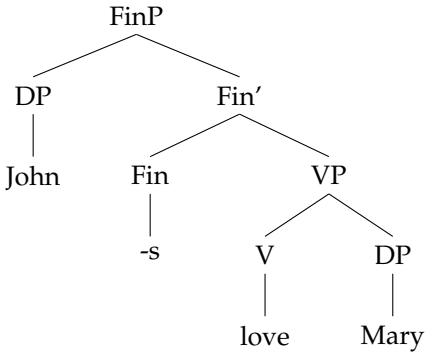
Umut Özge

COGS 532: Theoretical Linguistics
METU, Informatics

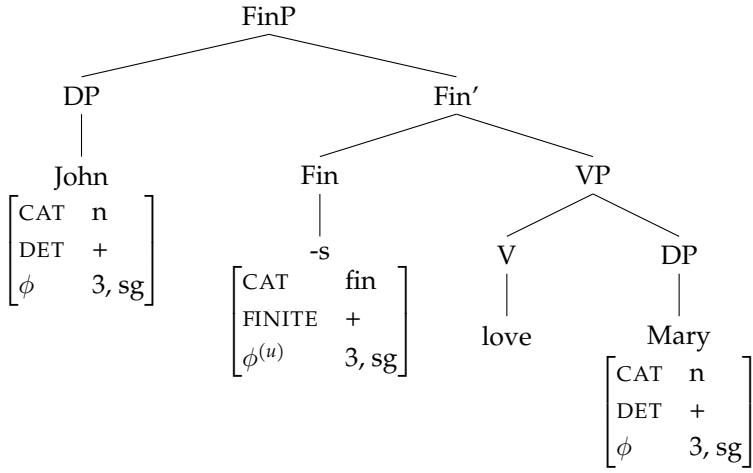
Interpretable versus uninterpretable features

(1) a. *John walk.
b. *I walks.
c. *They walks.

(2) John loves Mary.



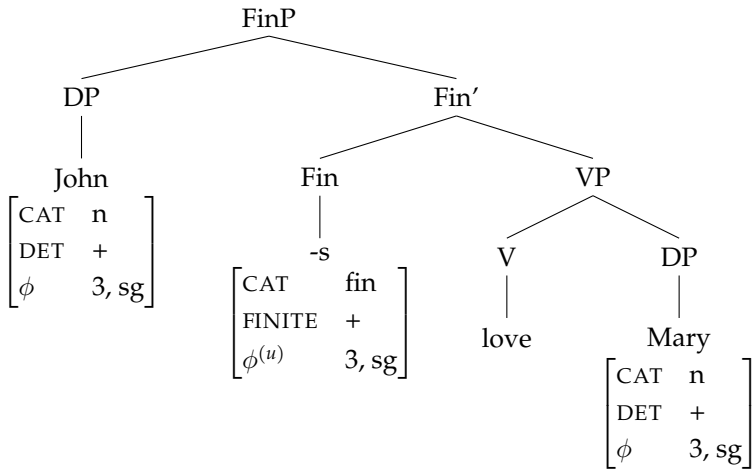
(3) John loves Mary.

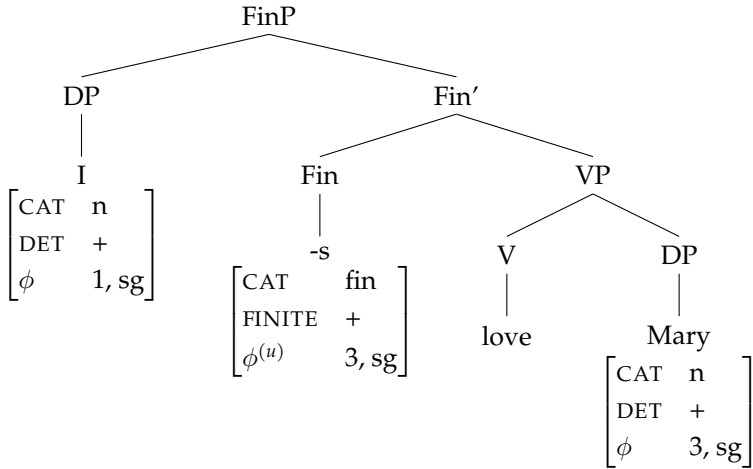


Agreement (to be revised)

In a tree Γ, if there is a node α with $\left[\mathrm{F}^{(u)}\right]$, then there needs to be another node β with $\left[\mathrm{F}\right]$, such that there are no maximal projection nodes that include α without including β or vice versa.

(3) John loves Mary.





(4) *I loves Mary.
