

Constituent structure

Umut Özge

COGS 532: Theoretical Linguistics
METU, Informatics

① A B C linear precedence relation
 $A < B \checkmark$
 $C < B \times$

partitioning (Fig. A B | C D E | F)
 \equiv grouping

③ (A (B C)) LP + G + hierarchy

((A D) C)

Claim: Linguistic sequences
 are hierarchically structured.

green tea filter

((green tea) filter)

· (green (tea filter))

{John (loves Mary)}

= "VP-fronting"

①

[loves Mary] is what John does

[John loves] Mary.

②

John [loves Mary] and Bill does so too.

VP-Ellipsis

* [John loves] Mary and X Harry

(S(V O)) (S(V) O)

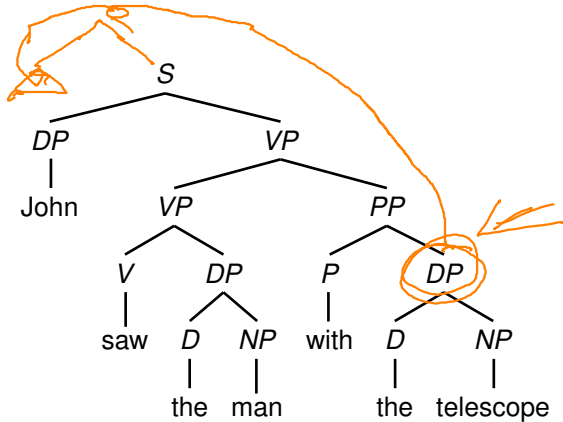

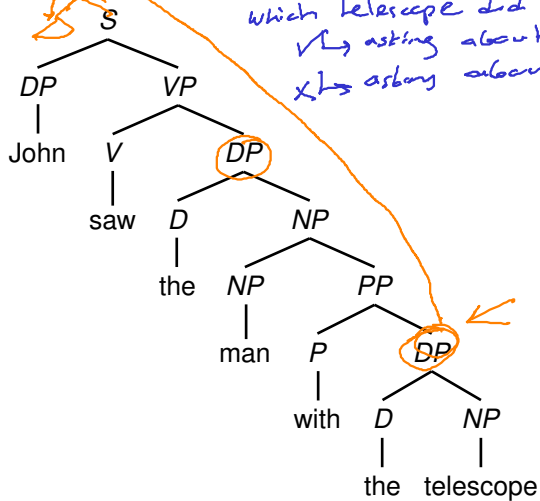

→ move around X

(1) (John saw the man with the telescope.)

(2) John saw the man with the telescope.

which telescope did John see the man with -
 ✓ asking about the telescope John used.
 ✗ asking about the telescope the man holds.

Constraint: X cannot move out of X.
