

Name of the Student: _____

Question 1

Read Sag et al. (2003), chapter 5.

Question 2

You are asked to write a grammar (lexical items and PS rules) for a very basic fragment of the language you will study in your term project. If you chose English, please write your grammar on Turkish, since we have already covered English grammars for such a simple fragment. Your fragment should be able to handle at least:

- (a) Proper names;
- (b) Indefinite and definite noun phrases;
- (c) Intransitive, transitive and ditransitive verbs;¹
- (d) At least two additional types of verbs, whose complement taking property does not match the previous item;
- (e) Agreement of subjects, complements or determiners with their heads.

It is fine if some of these are absent in the language of your choice.

¹By “ditransitive” let us agree to mean verbs taking two complements which are noun phrases, possibly case-marked.
